General Application Ductless Fume Hoods

Provides Feature-Rich Operator Safety for General Applications

Meets or Exceeds OSHA, ANSI and other International Standards

Purair® PS-24 shown with optional air velometer
INTRODUCTION
The Purair® Basic ductless fume hoods are a series of high efficiency products designed to protect the user and the environment from hazardous vapors generated on the work surface. At the heart of the Purair fume hood product line is the innovative Air Science Multiplex™ Filtration Technology that creates a safe work environment over the widest range of applications in the industry.

DUCTLESS TECHNOLOGY: The Eco-friendly Choice
Advanced carbon filtration technology offers a safe, high performance alternative to conventional ducted fume hoods for a broad range of applications.

- **Environmental Benefits.** Air Science ductless fume hoods isolate and trap chemical vapors to prevent ecological impact through release into the environment.

- **Versatile.** Each filtration system is selected for its specific application. The Multiplex Filter broadens the range of applications. Carbon filters are available in more than 14 configurations for use with vapors or organic solvents, acids, mercury and formaldehyde. HEPA/ULPA filters can add to biological safety.

- **Easy to Install.** The ductless fume hood is self-contained and does not require venting to the outside. Many units are portable and may be moved from one location to the next with minimal down-time and without filter changes. Set-up, operation and filter maintenance are straightforward.

- **Energy Efficient.** Because filtered air is returned to the room, no demands are required of the facility HVAC capacity for make-up air.

- **Cost Effective.** Facility ductwork, HVAC and construction costs are eliminated.

- **Safe to Use.** Cabinet airflow and face velocity protect users from incidental exposures to fumes.

- **Self testing.** (selected models) Electronic air-flow monitoring assures continuous safety. An electronic gas sensor monitors carbon filter performance.

APPLICATIONS
- Compounding
- Enclosing balances, microscopes, and robotic equipment
- Forensics
- Histology
- Educational
- Microscopy
- Mobile and classroom demonstrations
- Pharmaceutical
- Powder fingerprinting
- Powder weighing
- Sample prep work
- Soldering
- Solvent cleaning and welding
- Veterinary and dental work
PRODUCT FEATURES:
A. Filter I.D. Window: A strategically placed front cover window shows the installed filter part number and installation date for convenience and to encourage timely filter replacement.
B. Air Velometer: (Optional) An analog air velocity meter in the field of vision of the user.
C. Hinged Front Sash: When closed, the cabinet sash protects the contents from inadvertent external contact, and better isolates the air within. The sash is easy to open and close.
D. Control Panel: Electronic controls and displays include switches for the blower and low airflow alarm.
E. Steel Support Frame: The chemical resistant epoxy coated steel frame adds mechanical strength. Optional all polypropylene construction is available if desired; see Accessories.
F. Electrostatic Pre-Filter: The 99.5% effective electrostatic pre-filter is accessible from inside the chamber to contain the release of any particulates that it traps. The pre-filter can be changed while the unit is operating to prevent operator exposure to chemical vapors.
G. Pass Through Ports: Electrical cords and cables are safely routed into the cabinet through ports on the back and side walls.
H. Color: The cabinet is white with blue trim; side and back panels are clear.
I. Airflow Alarm: A continuous air velocity monitoring system alerts the operator upon unacceptable values.
J. Internal Manual Speed Controller: Authorized personnel may set the centrifugal fan motor speed as desired.
K. Stand: Optional mobile cart with locking casters.
L. Work Surface: The internal work surface can be fitted with an optional polypropylene tray; see Accessories.
M. Filter Door Key: Filter access keys prevent unauthorized removal or accidental exposure to dirty filters.

OTHER FEATURES:
360 Degree Visibility: Clear back and side panels allow ambient illumination into the chamber and provide users with an unobstructed view of its contents.

Standards Compliant: Performance specifications and construction meet or exceed OSHA, ANSI and relevant international standards to assure operator safety.

Construction: All models are available in either metal or polypropylene construction. See selection chart for specifications and dimensions. Specify metal or polypropylene when ordering. Available in 110V, 60Hz or 220V, 50Hz models.

Steel Support Frame: The chemical resistant epoxy coated steel frame adds mechanical strength. Optional all polypropylene construction is available if desired.
**THE AIR SCIENCE PERFORMANCE ADVANTAGE**

Each Air Science fume hood includes features expressed through sound design and certified quality construction. Options and accessories add functional performance to meet specific applications.

- **Professional Quality.** Air Science fume hoods comply with current technical and safety regulations.
- **Multiplex Filtration.** The Air Science Multiplex™ Filter offers a range of options for high performance.
- **Industrial Components.** The cabinet frame and work surfaces are durable and chemically resistant.
- **Reliability.** Internal systems are isolated from fumes, extending product life.

**AIR SCIENCE MULTIPLEX FILTRATION TECHNOLOGY**

Multiplex Filtration consists of a pre-filter and main filter to create a combination of chemical and physical architecture customized to each application. The mechanical design enhances safety, convenience and overall value.

- The electrostatic pre-filter is accessible from within the cabinet.
- A filter clamping mechanism allows for the filter to be easily installed and ensures an even seal at the filter peripheral face at all times to prevent bypass leakage.
- The filter chamber prevents contaminated air from contacting internal cabinet mechanisms.
- The main filter number and installation date are displayed in a front-access window.

The Air Science carbon filtration technique is based on enhanced, activated carbon particle formulations from specially selected, naturally occurring raw material superior to wood or other organic sources. The carbon is treated to attain the proper porosity and aggregate surface area and to react with several ranges of aerosolized chemicals moved through the filter by an air handling blower.

- The multiplex option permits one or more filtration options to be combined to meet a wider range of multiple-use applications. Multiplexing permits configuration for the capture of acids, bases and particulates such as biological aerosols when paired with HEPA or ULPA filters.
- The Air Science carbon filter is a self-contained assembly sized to fit the specified product model number, and configured to optimize airflow across 100% of the filter surface area for maximum efficiency, prolonged filter life, optimal diffusion and saturation capacity, and user safety.

Air Science is the single source supplier for all pre-filters and carbon filters used in its products, plus those of many other manufacturers.

---

**Basic control panel. Standard on Purair Basic Models, includes On/Off switch and low airflow alarm.**

**Optional Advanced control panel with hour meter to aid in determining available filter life and Filter Saturation Alarm (FSA). The FSA adds an electronic gas sensor and emits audio and visual alerts when the main filter needs to be changed.**
**PURAIR BASIC FEATURES & BENEFITS**

Puraire Basic products are available in 3 standard sizes, each with 4 configuration options and metal or polypropylene construction, totaling 24 standard models.

- High capacity air handling system delivers face velocity of 100 FPM.
- A low airflow alarm warns of insufficient face velocity.
- The Air Science filter assembly is easy to access, easy to change.
- A unique filter clamping design eliminates bypass leakage outside the cabinet.
- Accessories include an optional filter saturation alarm.

The Multiplex filter configuration permits a customized combination of filter media for a broad range of chemical families and biological agents if required. EFT Filtration Technology broadens the Air Science application for ductless fume hoods.

## Product Specifications

**Model: Purair® P5-24**

- **Height:** 484 mm
- **Dimensions:** 24" x 27" x 31"
- **Shipping Dimensions:** 40" x 40" x 40"
- **Weight:** 68 / 31 lbs/Kg

**Model: Purair® P5-36**

- **Height:** 484 mm
- **Dimensions:** 36" x 27" x 31"
- **Shipping Dimensions:** 40" x 40" x 40"
- **Weight:** 95 / 43 lbs/Kg

**Model: Purair® P5-48**

- **Height:** 484 mm
- **Dimensions:** 48" x 27" x 31"
- **Shipping Dimensions:** 45" x 55" x 40"
- **Weight:** 133 / 60 lbs/Kg

**Models with Straight Legs (Reduced Depth)**

**Model: P5-24S**

- **Height:** 484 mm
- **Dimensions:** 24" x 24" x 31"
- **Shipping Dimensions:** 40" x 40" x 40"
- **Weight:** 65 / 29 lbs/Kg

**Model: P5-36S**

- **Height:** 484 mm
- **Dimensions:** 36" x 24" x 31"
- **Shipping Dimensions:** 40" x 40" x 40"
- **Weight:** 92 / 42 lbs/Kg

**Model: P5-48S**

- **Height:** 484 mm
- **Dimensions:** 48" x 24" x 31"
- **Shipping Dimensions:** 45" x 55" x 40"
- **Weight:** 130 / 59 lbs/Kg

**Models with Extra Tall Legs**

**Model: P5-24-XT**

- **Height:** 600 mm
- **Dimensions:** 24" x 27" x 35"
- **Shipping Dimensions:** 40" x 40" x 40"
- **Weight:** 72 / 33 lbs/Kg

**Model: P5-36-XT**

- **Height:** 600 mm
- **Dimensions:** 36" x 27" x 35"
- **Shipping Dimensions:** 40" x 40" x 40"
- **Weight:** 99 / 45 lbs/Kg

**Model: P5-48-XT**

- **Height:** 600 mm
- **Dimensions:** 48" x 27" x 35"
- **Shipping Dimensions:** 45" x 55" x 40"
- **Weight:** 138 / 63 lbs/Kg

**Models with Extra Tall Straight Legs (Reduced Depth)**

**Model: P5-24-XTS**

- **Height:** 600 mm
- **Dimensions:** 24" x 24" x 35"
- **Shipping Dimensions:** 40" x 40" x 40"
- **Weight:** 72 / 33 lbs/Kg

**Model: P5-36-XTS**

- **Height:** 600 mm
- **Dimensions:** 36" x 24" x 35"
- **Shipping Dimensions:** 40" x 40" x 40"
- **Weight:** 99 / 45 lbs/Kg

**Model: P5-48-XTS**

- **Height:** 600 mm
- **Dimensions:** 48" x 24" x 35"
- **Shipping Dimensions:** 45" x 55" x 40"
- **Weight:** 138 / 63 lbs/Kg

### Filter Summary

<table>
<thead>
<tr>
<th>Formula</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>GP Plus!</td>
<td>The most widely used filter in the range, primarily for solvent, organic, and alcohol removal.</td>
</tr>
<tr>
<td>ACI Plus!</td>
<td>Neutralizes volatile inorganic acid vapors.</td>
</tr>
<tr>
<td>ACR</td>
<td>Iodine and methyl iodide vapors. It is frequently used for iodination reactions with low level radioactive iodine.</td>
</tr>
<tr>
<td>ACM</td>
<td>Mercury vapor.</td>
</tr>
<tr>
<td>AMM</td>
<td>Removes vapors from dilute ammonia solutions and to remove low molecular weight amines.</td>
</tr>
<tr>
<td>SUL</td>
<td>Designed to remove hydrogen sulfide and low molecular weight mercaptans.</td>
</tr>
<tr>
<td>CYN</td>
<td>Removal of hydrogen cyanide. Many cyanide compounds will evolve HCN gas if acidified, so this filter is normally specified if working with any cyanide compound.</td>
</tr>
<tr>
<td>FOR</td>
<td>Designed to oxidize formaldehyde and glutaraldehyde fumes. It is widely used in hospital pathology laboratories.</td>
</tr>
<tr>
<td>ETH</td>
<td>Diethyl ether is adsorbed on activated carbon, but because of its low boiling point, local heat adsorption can reduce the capacity of the filter. Special impregnation allows a chemical reaction which increases the filter capacity.</td>
</tr>
<tr>
<td>HEPA/UPLA</td>
<td>Powders and particulates.</td>
</tr>
</tbody>
